UNIVERSITY OF HAMBURG

Diploma Supplement

Mr Farhad Zazai

born on 15 January 1980 in Kabul / Afghanistan

attained on 22 July 2014

the academic title of "Diplom Physiker".

For the accomplishments an overall grade[1]

" good "

has been awarded.

The following grades were achieved in oral examinations, respectively:

Examination subject	Examiner	Grade
Experimental Physics	Prof. Dr. C. Hagner	good
Theoretical Physics	Prof. Dr. A. Lichtenstein	good
Elective core subject: Electronics I and Electronics II	Dr. T. Matsuyama	good
Elective additional subject: Mathematics with Focus on Applied Mathematics	Prof. Dr. J. Struckmeier	excellent

The Diploma thesis was assessed: excellent

Thesis title: " Effective Model of Doublon Decay "

Hamburg, 24 September 2014

Universität Hamburg
62
Fakultät
Mathematik, Informatik und Naturwissenschaften

W. Hansen

(Prof. Dr. W. Hansen)
Chairman, Examination Committee,
Diploma Studies in Physics

[1] Examination grades are awarded on a scale of 1-5, whereon 1 (*excellent*) corresponds to an excellent performance, and 5 (*insufficient*) is the lowest grade (*fail*). Grades 2 (*good*), 3 (*satisfactory*), and 4 (*sufficient*) correspond to performances that are significant beyond the average requirements, meet the average requirements or are sufficient despite deficiencies. The overall grade quoted is determined from the weighted mean of the examination results (weight 1) and the diploma thesis (weight 2). From the average value the hundredths are truncated. Values up to 1.5 correspond to *excellent*, values between 1.5 and 2.5 to *good*, values between 2.5 and 3.5 to *satisfactory*, values between 3.5 and 4.0 correspond to *sufficient*, and values above 4,0 are graded as deficient. Provided the final grade is 1.0, an endorsement "with honours" will be added.

UNIVERSITY OF HAMBURG

Mr Farhad Zazai

The examinations comprise the following modules (CP are credit points[2]):

Examination Subject	Modules	Grades[3]	CP
Experimental Physics	Physics IV		8
	Physics V		8
	Physics VI		8
	Examiner: Prof. Dr. C. Hagner	2,3	6
Theoretical Physics	Theoretical Physics II		10
	Theoretical Physics III		10
	Theoretical Physics IV		10
	Examiner: Prof. Dr. A. Lichtenstein	2,0	6
Elective core subject	Electronics I and Electronics II		12
	Examiner: Dr. T. Matsuyama	1,7	6
Elective additional subject	Mathematics with Focus on Applied Mathematics		12
	Examiner: Prof. Dr. J. Struckmeier	1,3	2
Thesis	Focussed studies		15
	Supervisor: PD Dr. A. Chudnovskiy	1,3	45

In addition the following modules are obligatory for the Diplom-physics graduate course:

Module		CP
Advanced laboratory / student research project	Physics laboratory for advanced students I	12
	Experimental research project	12
Elective core subject	Quantum Mechanics II	12
Advanced course in " Quantum Mechanics II "		4

Intermediate diploma credit points	102
Total credit points	300

Hamburg, 24 September 2014

Universität Hamburg

Fakultät
Mathematik, Informatik und Naturwissenschaften

W. Hansen

(Prof. Dr. W. Hansen)
Chairman, Examination Committee,
Diploma Studies in Physics

[2] Credit points are awarded according to the European Credit Point System.
[3] The module grades are awarded on a scale of 1-5. In order to differentiate, intermediate values can be formed by adding or subtracting 0.3. The values 0.7, 4.3, 4.7, and 5.3 are excluded. Grades for the examination subjects are determined from the average values of the grades for the modules with the hundredths truncated.

UNIVERSITY OF HAMBURG

Translation of the DIPLOMA certificate

Mr Farhad Z a z a i

---

born on 15 January 1980 in Kabul / Afghanistan

has successfully completed a course of studies leading to the German "Diplom" in Physics, and having passed the relevant examinations with an overall grade

" good "

has been awarded the German academic qualification

DIPLOM - PHYSIKER

Hamburg, 24 September 2014
